3. ASSET BACKING & VALUATION (THE "BILLIONS" FOUNDATION)

- **Trust Unit Injection (2018):**
 - **Transaction A:** 81,831.39 NVC Trust Units (CUSIP: 67074B105) exchanged for Preferred F.
 - **Transaction B:** 511,446.17 NVC Trust Units (CUSIP: 67074B105) exchanged for Preferred C.

4. SEC MARKET STATUS & POSITIONING

- **Regulatory Status:** Expert Market (Rule 15c2-11)
- **Current Market Cap:** ~\$44k (Price Distortion)
- **Intrinsic Asset Value:** ~\$29B (Verified Book Value)
- **Positioning:** The current price distortion reflects the "Expert Market" restriction and does not correlate with the underlying \$29B asset base. This provides a stable baseline for institutional consolidation before a formal "Pink Current" restoration and full market normalization.

5. INTEGRATION ROADMAP FOR THE NVC ECOSYSTEM

1. **Public Attestation:** Use IBRC as the publicly reporting vehicle for NVCT's on-chain reserves.
2. **NVCT Convertible Debt:** Issue IBRC bonds convertible into NVCT stablecoin to attract institutional yield-seekers.
3. **Institutional Capital Gateway:** Position IBRC as the primary public entry point for sovereign wealth integration and institutional capital deployment across global markets.
